

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	6ab221fbe880316a482c6241
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe the customer and their attributes here
I'm trying to	List the thing they are trying to achieve here
But	Describe the problems or barriers that get in the way here
Because	Describe the reason the problems or barriers exist
Which makes me feel	Describe the emotions the result from experiencing the problems or barriers

Example:

I am	I'm trying to	But	Because	Which makes me feel
An EEE branch faculty who owns the EEE records	Make sure only EEE branch users can view the EEE records	Users from other branches can also open the records	The ACL uses only roles and cannot check the user's branch	Worried and insecure

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An EEE branch faculty who owns the EEE records	Make sure only EEE branch users can view the EEE records	Users from other branches can also open the records	The ACL uses only roles and cannot check the user's branch	Worried and insecure about data privacy
PS-2	A ServiceNow admin who manages record access	Restrict access without creating separate tables or many roles for each branch	Manual role and group handling is slow and error-prone	There is no single reusable rule that decides access at runtime	Frustrated and overloaded
