

Project Design Phase Problem – Solution Fit Template

Date	15 February 2025
Team ID	6ab221fbe880316a482c6241
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) [CS] College students, faculty and admins using ServiceNow. Mainly EEE branch users who must view EEE records.	2. CUSTOMER CONSTRAINTS [CC] Role-based ACL alone is too coarse. Limited budget; no extra tools or plugins. Admins need a simple, maintainable rule.	3. AVAILABLE SOLUTIONS [AS] Role-only ACLs, separate tables per branch, or manual data sharing. These are hard to maintain and can still leak data.
Focus on J&P, tap into BE, understand RC	4. JOBS-TO-BE-DONE / PROBLEMS [J&P] Job: keep EEE records visible only to EEE users. Problem: users from other branches can open EEE records.	5. PROBLEM ROOT CAUSE [RC] No condition-based rule checks the user's branch. Any user with a basic role can read the table.	6. BEHAVIOUR [BE] Users open lists and forms to view records. Admins assign roles by hand as a workaround.
Identify strong TR & EM	3. TRIGGERS [TR] A non-EEE user is seen opening EEE records, or a data privacy complaint is raised. 4. EMOTIONS: BEFORE / AFTER [EM] Before: worried and insecure about data privacy. After: confident that data is protected.	10. YOUR SOLUTION [SL] A script-controlled ACL on the read operation checks whether the user belongs to the EEE branch. If yes (or admin), answer = true; otherwise answer = false. Tested by impersonating EEE and non-EEE users.	8. CHANNELS OF BEHAVIOUR [CH] 8.1 ONLINE Users access records through the ServiceNow list, form or portal. 8.2 OFFLINE Department notices and training sessions explain who can access which records.
