Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Project Demo Planning: Script-Controlled ACL – Restrict Record Access Based on Field Value

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce the team and explain why record access must be restricted based on a field value.	1	Alagu Mageshwari G
2	Solution Overview	Explain the script-controlled ACL approach and how it evaluates the field value and user role.	2	Deva Arul Georgin A
3	ACL Creation & Script	Show the record-level ACL and walk through the script that returns answer = true or false.	3	Alagu Magajothi M
4	Field Value-Based Restriction	Demonstrate restricted records (e.g., State = Closed) being blocked while other records stay accessible.	3	Janani D
5	Testing via Impersonation	Impersonate an authorized user and an unauthorized user to compare access results.	3	Iswarya C
6	Q&A Session	Answer questions from the evaluators and summarize the outcomes.	3	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Brief team introduction and the access-control problem being solved.
2	Solution Overview	High-level explanation of the script-controlled ACL and its logic.
3	Live Feature Demonstration	ACL creation, field value restriction, and impersonation testing shown live.
4	Q&A Session	Clarify doubts and conclude the demonstration.
