

No. of Functional Features Included in the Solution

Date	29 Sept 2026
Team ID	6ab221fbe880316a482c6241
Project Name	Script-Controlled ACL – Restrict Record Access Based on Field Value
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Field-Value Based Access Restriction	Blocks access to a record when a specific field has a restricted value (for example, State = Closed).	ACL Script	Done	1
2	Role-Based Check	Allows access only to users who have the required role, along with the field-value condition.	ACL / Roles	Done	1
3	Read Access Control	Controls which users can view the record on the form and list.	Read ACL	Done	0.5
4	Write Access Control	Controls which users can edit the record based on the field value.	Write ACL	Done	0.5
5	Reusable Script Include	Common function for the role and field-value check, reusable across multiple tables.	Script Include	Done	0.5
6	Null Handling and Default Deny	Handles empty field values safely and denies access by default (answer = false).	ACL Script	Done	0.5
7	Restricted Records Hidden in List / Form	Restricted records are not shown to unauthorized users in the list and form views.	List / Form View	Done	0.5
8	Testing Using Impersonation	Verified access with test users of different roles and records with different field values.	Test Users / Records	Done	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must Have Features	6
Additional / Nice to Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	1	Restricted records hidden in list and form views
2	Backend / Logic	4	Field-value condition, reusable Script Include, null handling, impersonation testing
3	Database / Storage	0	Not applicable (existing table fields are used as the condition)
4	API / Integration	0	Not applicable (ACL is applied to REST access by the platform)
5	Security / Authentication	3	Role-based check, Read ACL, Write ACL
